		disaster risk and emergency management in county crop sector policies and plans. (ff) Develop and implement county specific emergency operation plans for crop sector. (gg) Establish county rapid response teams for emergency management in crop sector.				with the communities' cross border cooperation on the management of cross border range resources. (i) Implement in collaboration with communities, national guidelines for the utilization and management of rangelands.	technical assistance to the county governments on restoration and conservation of the rangelands. (j) conduct periodic national rangeland health assessments. (k) Develop standards and norms for livestock and livestock products. (l) Develop national policy, legislation, standards and norms on apiculture (beekeeping) development. (m) Conduct and disseminate research on apiculture. (n) Develop guidelines on livestock resources statistics and knowledge management (o) Provide capacity building to county governments (p) Establish a digitized national livestock resources data management system. (q) Develop national policy, legislation, standards and norms guiding hides and skins improvement. (r) Provide capacity building to county governments. (s) Enforce standards for export and import markets.
28	Animal husbandry.	(a) Provide livestock extension services to deliver husbandry technologies to livestock farmers and pastoralists. (b) Establish and manage range lands and fodder Feed Reserves. (c) Develop county specific livestock extension policy where necessary. (d) Implement standards and norms for livestock extension services. (e) Provide capacity building and technical assistance to farming communities. (f) Collaborate with national research institutions to identify and prioritize county research needs on animal husbandry. (g) Implement the national range land management strategy. (h) Implement in collaboration	(a) Develop the national extension service policy. (b) Develop standards and norms for extension services. (c) Provide capacity building and technical assistance to county governments on animal husbandry. (d) Conduct and disseminate research on animal husbandry. (e) Develop the national range land management strategy. (f) Develop cross-border cooperation agreements on the management of cross-border range resources. (g) Develop guidelines for the utilization and management of rangelands (h) Develop the national programs for the restoration and conservation of the rangelands. (i) Provide		(j) Implement in collaboration with communities, national program for the restoration and conservation of rangelands. (k) Provide capacity building to communities on restoration and conservation of the rangelands. (l) Develop and implement in consultation with communities range land specific resource use and management and plans and strategies. (m) Develop and implement county specific legislations and regulations on management of the rangelands. (n) Develop and implement cross-county memoranda of understanding for utilization of common rangeland landscapes.		

Function	County Governments	National Government	Function	County Governments	National Government
	(o) Develop and implement county and inter-county specific programs on restoration and conservation of the rangelands.	on hides and skins and leather. (i) Promote export market for hides, skins and leather. (u) Develop national programs for food security.		(x) Provide infrastructure for production, processing and marketing of honey.	on livestock breeding. (ee) Integrate disaster risk and emergency management in national livestock sector policies and plans
	(p) Implement under the direction of national government, the management of international cooperation agreements on management of rangeland resources.	(v) Develop guidelines for national food security programs to be implemented by the county governments. (w) Establish national strategic food and feed reserves.		(y) Mobilize farmers into associations, groups and cooperatives to enhance honey marketing (z) Establish colony multiplication centres. (aa) Implement guidelines on management of livestock resource data and knowledge management	(ff) Develop national emergency plans for livestock sector (gg) Establish national rapid response team. (hh) Develop national guidelines and standards on development of infrastructure to promote livestock and livestock products.
	(q) Implement findings from periodic national rangeland health assessments.	(x) Develop a legal framework for national and county food and feed reserves.		(bb) Provide capacity building to farmers	(ii) Develop national policy to promote feedlots
	(r) Enforce standards and norms on Livestock and Livestock Products.	(y) Develop national livestock breeding policy. (z) Develop standards and quality assurance protocols for livestock genetics and livestock breeding technologies.		(cc) Undertake routine livestock resources data collection, collation, analysis and reporting (dd) Digitization of county livestock resources data.	(jj) Develop national standards and quality control of pesticides (kk) Develop national policies, legislations, strategies and regulations on animal health.
	(s) Implement the national policy, legislation, standards and norms on apiculture (beekeeping) development.	(aa) Establish national breeding programs.		(ee) Implement national policy, legislation, standards and norms guiding hides and skins improvement.	(ll) Collaborate with county governments to conduct pesticide resistance surveillance (mm) Develop national policies and regulations for animal vaccine quality control
	(t) Develop and implement county specific apiculture policy, strategy and legislation.	(bb) Establish national livestock genetic resource, research and conservation centres		(ff) Establish, operationalization and manage county tanneries and cottage industries for value addition of hides and skins.	(nn) Development and production of vaccines (oo) Coordinate the management of trans-boundary animal diseases.
	(u) Provide technical assistance to the farmers on apiculture	(cc) Promote research on assisted reproductive technologies for livestock breeding		(gg) Provide capacity	(pp) Develop national
	(v) Collaborate with national institutions to identify county research need on apiculture	(dd) Build capacity and offer technical assistance to the county governments			
	(w) Provide beehives and beekeeping equipment

		infected materials. (t) Implement national guidelines and standards on use and sale of agro-chemicals and other inputs. (u) Provide technical assistance to agro-chemicals and other inputs dealers and farmers on safe and effective use (v) Implement National Guidelines on disposal of agro-chemicals and other inputs.	technical assistance to county governments. (s) Develop National Guidelines on disposal of agro-chemicals and other inputs.			(k) Implement national standards and norms for fish health. (l) Issue county fish health certificates. (m) Implement national guidelines for development and maintenance of fish landing stations and jetties (n) Develop and maintain fish landing stations, jetties and fish auction centres. (o) Levy fish landing fees. (p) Levy fish landing fees on designated fish ports. (q) Demarcate all fish breeding areas and fence fish landing stations. (r) Implement regulations on fish movement. (s) Issue— (i) county fish trade licenses; (ii) Fish and fishery products movement permits. (t) Collect and capture fish statistics data. (u) Implement national fisheries regulations and compliance management measures. (v) Implement fisheries policy, fisheries management measures and regulation and limit access to fishing. (w) Fisheries monitoring, control and surveillance in accordance with the national framework Zone for aquaculture-disease control	(k) Train and certify fish inspectors. (l) Develop national guidelines for development and maintenance of fish landing stations and jetties and auction centres. (m) Develop and maintain designated fish ports. (n) Develop regulations on fish movement. (o) Issue export/import— (i) fish trade licenses (ii) Fish and fishery products movement permits. (p) Develop a national fish information system. (q) Develop national fisheries regulations and compliance management measures. (r) Develop a framework for monitoring, control and surveillance of fisheries.
30	Fisheries extension services	(a) Develop county specific fisheries extension service policy, where necessary. (b) Implement standards and norms for fisheries extension services. (c) Provide capacity building and technical assistance to communities. (d) Collaborate with national research institutions to identify and prioritize local research needs. (e) Implement the national aquaculture policy (f) Implement national standards and norms in aquaculture (g) Promote aquaculture within the county. (h) Establish and manage county fish seed bulking/multiplication centres. (i) Implement standards and norms for county fish seed bulking centres. (j) Undertake on-farm trials.	(a) Develop the national fisheries extension service policy. (b) Develop standards and norms for fisheries extension services. (c) Build capacity and provide technical assistance to county governments. (d) Conduct fisheries research. (e) Develop a national aquaculture policy. (f) Develop national standards and norms in aquaculture. (g) Establish national research, training, conservation and seed bulking centres. (h) Develop national standards and norms for fish seed bulking centres. (i) Develop national standards and norms for fish health certification. (j) Issue national fish health certificate for import and export.

		within the county. (x) Zone for aquaculture-disease control within the county.				standards and norms in meat processing.	norms in meat processing and trade.
31	Livestock Yards Sale	(a) Implement national standards for establishment of county livestock sale yards and modern livestock markets. (b) Enforce standards on private livestock sale yards and modern livestock markets. (c) Develop and manage county sale yards and modern livestock markets. (d) Inspect and license county livestock sale yards and modern livestock markets. (e) Collect cess and fees that relate to county livestock sale yards and modern livestock markets. (f) Inspect and certify disease free status. (g) Issue livestock movement permits. (h) Impose and withdraw quarantines and closure of county livestock sale yards and livestock markets to control disease outbreaks and safeguard public health.	Develop national standards for establishment of livestock sale yards and modern livestock markets.		(d) Inspect and license of county abattoirs. (e) Collect meat inspection fees. (f) Lease, inspect and license county slaughter houses. (g) Appoint county meat inspectors. (h) Issue slaughter man /flayers license. (i) Standardize, inspect and license meat carriers and their mode of transport for export. (j) Standardize, inspect and license meat carriers and their mode of transport. (g) Certify meat and meat products for export.	(d) Train meat inspectors on hygiene and quality standards in meat processing. (e) Build capacity and offer technical assistance to county governments in meat processing. (f) Standardize, inspect and license meat carriers and their mode of transport for export. (g) Certify meat and meat products for export.	
32	County Abattoirs	(a) Implement national guidelines and standards on construction and management. (b) Site, design, construct, equip operationalize and manage county abattoirs. (c) Implement national guidelines,	(a) Develop national guidelines and standards on construction and management. (b) Site, design, construction, operationalization and management of export abattoirs. (c) Develop national guidelines, standards and	Control of air pollution, noise pollution, other public nuisances and outdoor advertising	(a) Implement national policies and legislation. (b) Formulate county policies and legislation on Control of air pollution, noise pollution, other public nuisances and outdoor advertising within the framework of national policies and legislation (c) Control noise pollution and develop noise level guidelines (d) Determine and control other public nuisances (e) License and enforce compliance for persons exceeding the permissible noise levels. (f) Undertake noise mapping and action plan development Implement and enforce national policies, legislation on control of air pollution, noise pollution, other public nuisances and outdoor advertising.	(a) Formulate national policies and legislation. (b) Provide capacity building and technical assistance to the counties.	
33	County Roads	(a) Develop and implement
